

WAVECOM INSTRUMENTS

Test and Measurement Instruments • Data Acquisition • Automation and Control • Sound and Vibration

Being a **leader** isn't easy.
But **LEADING EDGE TECHNOLOGY**
makes life **easier!**

**Wavecom Instruments is that leader in
Innovative Instrument Technology.**

Wavecom Instruments is 100% Australian owned and operated, with over 9 years of experience in the electrical and electronic industry. **Wavecom Instruments** can design and implement a solution tailored to suit your specific engineering application.

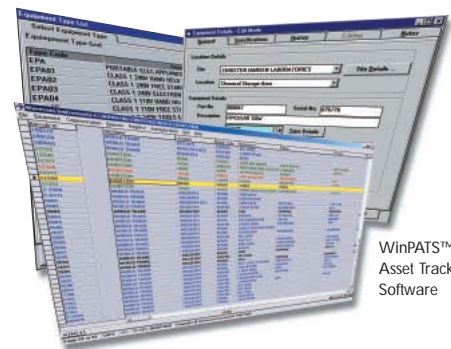

Our engineers have many years of experience in software and hardware development and can provide comprehensive technical support and assistance when you are developing your next project. Wherever you can automate, instigate or initiate - **Wavecom Instruments** integrates.

At **Wavecom Instruments** we have developed a series of products designed specifically for *Appliance Testing* as well as *Asset and Maintenance Management*. We also carry an extensive range of products by world leading manufacturers including National Instruments, Tektronix and Gage.

Our strengths lie in *Asset, Audit and Maintenance Management* as well as *Design and Manufacturing*.

We specialise in the following products and services:

- **WinPATSTM** Asset Management and Maintenance Software
- **WinPATSTM CE** (PDA Technology)
- **TnT** Test 'N' Tag Appliance Tester
- **TnT+** Advanced Appliance Tester (Power and Leakage Measurement)
- **SPL-8028X** Single Phase Logger
- Data Loggers
- Training Programs & Consultancy Service

WinPATSTM Professional
Asset Tracking System
Software

If you require any further information, data sheets or prices please ask any of our highly trained staff and they will assist you making your task a lot easier.

Ever wanted to **manage** your assets and **maintenance** single handedly?

.....**Now you can!!!!**

As soon as you have installed **WinPATSTM CE** on your Pocket PC fitted with a Socket Scanner.

Simply load the items, you planned for your work schedule, into the PDA and the rest is done out in the field. A range of communication options linking the PDA with your pocket PC are available including Infra Red, USB, Bluetooth, Socket GSM or Direct Line Connection.

The portability of mobile data collection brings a new level of convenience when utilising the compact computing power with a hand scanning system. **WinPATSTM CE** provides you with greater flexibility and ultimate portability.

Wavecom Instruments has experience combining many compact computing technologies and can provide you with revolutionary methods for improving your productivity and profitability.

We will gladly answer any questions you may have regarding your particular application and welcome the opportunity to demonstrate how effectively your business could be improved with the implementation of **WinPATSTM CE**.

WinPATSTM CE / Pocket PC / Socket Scanner

- Equipment combined with **WinPATSTM CE** enhanced software modules.
- Long Operating Times
- Low Power
- Rugged Compact PC

TnT**Simply the Best!**

Portable Appliance Tester

- ✓ One Button Operation
- ✓ Pass/Fail Indication with Test Result Displayed
- ✓ Large Graphic Display
- ✓ Tests Extension Leads without Extra Adaptor
- ✓ Robust Construction
- ✓ Mains Supply Condition Test
- ✓ Polarity and Continuity Test
- ✓ Insulation Test (250 & 500V)
- ✓ Earth Bond Test

If you need to **Test 'N' Tag** there is no other unit that comes close in price or quality as well as adhering closely with the specifications outlined by AS/NZ3760:2001. It must be Australian made, to be this good!
